

Our Story

Warrior was founded in 1978 and began manufacturing structural support systems for the grain handling industry including conveyor trusses, support towers, and stair platform systems. After new ownership acquired the company in 2002, Warrior expanded to serve additional industries including feed, mining, food processing, sand and gravel, refining, fertilizer, water treatment, biodiesel and ethanol. Warrior also made a substantial investment in equipment to fabricate structural steel for the construction industry. Warrior received AISC certification from the American Institute of Steel Construction in 2011 as well as CWB certification from the Canadian Welding Bureau that same year. In 2012 Warrior expanded its product line to include bulk weigh systems and hopper cones. In 2016 Warrior again expanded its product line to include material handling equipment.

Located in Hutchinson, Minnesota Warrior manufactures in a state of the art 150,000 square foot facility. Our clients have come to expect Warrior’s commitment to providing the highest quality products that are efficiently produced to meet our scheduled demand.

Warrior provides complete bulk weighing systems including hoppers, controls, hydraulics, support structure, platforms, access stairways, fall safe, control room, loadout spout, cleaner, sampler, custom engineering and start-up and training. Warrior Bulk Weigh Systems are NTEP certified and are the most **heavy duty, industrial grade**, systems provided in the industry.

BULK WEIGH SYSTEMS

“Over the Track”

“Beside the Track”

Factory assembled unit that arrives on the jobsite ready to be installed

Lower support structure with access stairway, sampler, control room and loadout spout.

Loadout spout

Control rooms

Options

- Several controllers to choose from
- Car readers
- Urethane, Kryptane, or Ceramic tile lining
- Automatic samplers
- Material Handling equipment
- Fall protection
- Towers and Catwalks
