

Clean-Masse Sanitary Drag Conveyor

***Improves sanitation of your product and your facility
while minimizing product mixing and cross contamination.
Customized for your specific application***

Unique Features Save you Time and Money

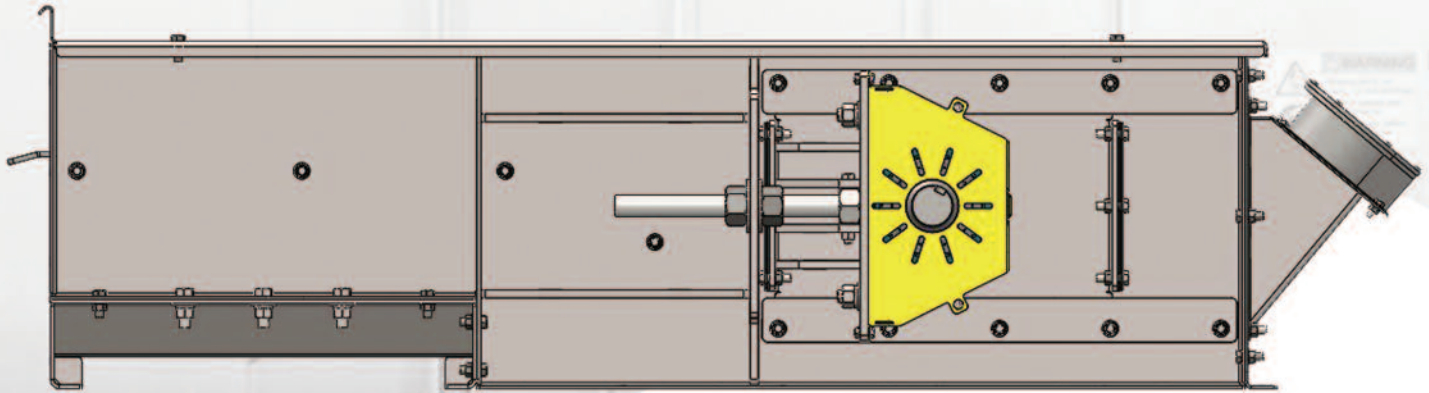

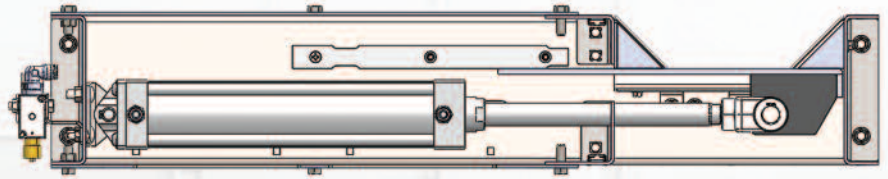

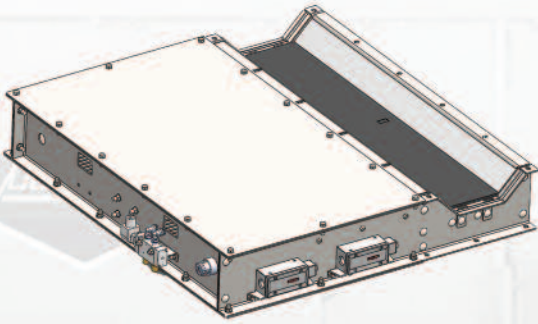

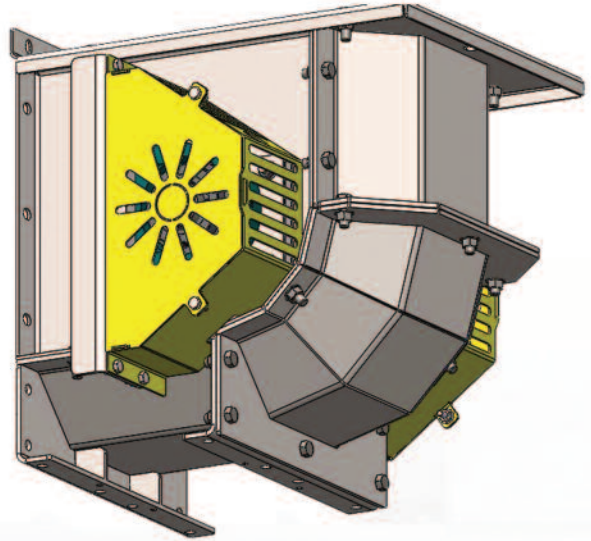

- Exceptional conveyor clean out, with unique formed bottom plate, reduce monthly cleanout labor costs
- Unique, tool-less access openings, (top & bottom) for fumigations, greatly reduce labor costs
- Press fit shaft seals standard for reduced dusting
- Vertical wipers for improved seal at take-up
- Standard: Clean, contoured tail section with head take-up for chain tensioning
- Optional: Take-up tail section with cleanout access.
- Food grade gasketing throughout.
- Stainless chain, stainless steel pins, stainless steel hardware options
- Sanitary UHMW roller return standard, AR or stainless rail return optional
- Flush mount discharge gates eliminate cross contamination and "pockets" of mixed materials
- Discharge gate slide plates, carbon steel or stainless steel
- Bottom plate available in AR steel, stainless
- Beveled UHMW flights for reduced carryover
- Construction options: painted carbon steel, galvanized or stainless steel
- AR side liners available as an option for abrasive material applications
- 4 piece, bolted construction (stainless hardware option)

Compared to Screw Conveyors:

- Better cleanout
- Improved Sanitation
- Less mixing of different materials
- Less product degradation
- Less maintenance
- Longer life (Customize thickness and materials)
- Typically lower HP requirements
- Optional AR (220 or 400) bottom plate and side liners
